- E. SESSION SUMMARY:

The document discussed a dark, black substance. This substance can create a circle and there were people working on a project. The document was discussing something technical in nature. The letters "tele" came into mind.

The document also dealt with something that one could see through or light or glass. Then I had the feeling of the word "optical."

At the end of the session, I had the feeling of animals and in particular a cat.

## BINARY STARS: ODD COUPLES

A MINORITY OF ONE, our sun has no companion star. But the majority of stars appear in company. Our nearest stellar neighbor, Alpha Centauri, is a three-star system, while Castor, in the constellation Gemini, must be counted as a trio of double, or binary, stars orbiting a common center.

When binary stars are close enough to interact with each other, they produce some of the most explosive, peculiar, and baffling events yet observed.
